

$$\frac{1}{2} \times 190' \times 205' = 19,475 \text{ sqft};$$

$$19,475 \text{ sqft} \times 10 \text{ ft}^* = 194,750 \text{ cubic ft};$$

$$194,750 \text{ cubic ft} \div 27 \frac{\text{cubic ft}}{\text{yd}} = 7,212 \text{ cubic yards}$$

* 10 foot depth of pond is an estimation
